Github Profile

Profile

A resourceful and flexible Software Developer with a passion to create and automate applications. My prior career in Defensive Contract Safety allowed me to optimize solutions with historical data and use predictive analysis to create new solutions or update old systems to current standards.

Languages

- JavaScript
- Python
- HTML
- TypeScript
- CSS

Libraries and Frameworks

- React
- Jquery
- Node.js
- Flask
- Express.js
- Bootstrap

- MongoDB

Skills

Time Management, Collaboration, Task Management, Communication, Adaptability, Accountability, Organization, Critical analysis, and Reliable.

Education

- General Assembly - Software Engineering Immersion Alumni - April, 2020

- Georgia State University - Biology (incomplete) - 2005

- HS CP+ Stockbridge High School - 2003

Experience Snapshot

ARTIST & REPERTOIRE PROFESSIONAL , A NU REVANU, DECATUR, GEORGIA (REMOTE) – AUGUST 2018-PRESENT

Developed the creative direction for artists using qualitative and quantitative indicators and customer feedback. Managed 4+ musical artist/DJ's asset deliverables and market extensions to fulfill brand partnership and customer database requirements.

SAFETY TECHNICIAN / NEW HIRE TRAINER , NISSHINBO AUTOMOTIVE MANUFACTURING INDUSTRY, COVINGTON, GEORGIA (REMOTE) – JANUARY 2018- JULY 2018

Inspecting equipment processes and equipment logs to revise out of date safety programs. Streamlined environmental waste program through geotagging waste points and repurposing unused areas to allocate storage and disposal processes. Updated new hire orientation modules, reduced training time, and reducing on site accidents by 50% within first quarter.

HOMEMAKER , MEDICAL HEALTH (REMOTE) – DECEMBER 2016-DECEMBER 2017

SAFETY PROGRAM AUDITOR (CONSULTANT) , LANTER DELIVERY SYSTEM, MORROW, GEORGIA – SEPTEMBER 2016 - DECEMBER 2016

Created a model safety program for the Morrow facility with training and consultation received by the Site Manager. Evaluated outdated safety programs, logs, OSHA 300A forms, and interviewed employees to generate a risk assessment report. Tabulated data to show overhead cost in areas of inefficiency with recommendations for improvements.
